• Task Title: Company Member Directory Web Page

• Task Description: The Company Member Directory Web Page is a single-page application designed to display a comprehensive list of all members of our company.

Steps Taken:

- In the HTML file, we have a basic structure with a header and a main section containing member information.
- In the CSS file, we reset default margin and padding, set basic styling for the body and header.
- We use CSS to create a responsive layout for the member list.
- Each member is styled with a background color, padding, border radius, and box shadow to make them stand out.
- Headings and paragraphs within each member block are styled appropriately.

• Challenges Faced: Finding logos and images a challenge in this project, and creating a responsive page is also to be a challenge for me

• Solutions Implemented: I employed media queries to develop a responsive webpage.

• Learnings: During the implementation process, I learned valuable lessons about frontend development.

• Project Update: Completed
